

TradingView Alert Checklist

FREE 1-PAGE GUIDE

Ten checks for clearer alerts and a more repeatable monitoring process.

Use before every price, indicator, or trendline alert.

SETUP

Tick each box before selecting Create

01

☐

Open the correct symbol and timeframe.

06

☐

Set expiration and review your plan limits.

02

☐

Define the exact setup you want to monitor.

07

☐

Choose app, email, popup, or webhook notifications.

03

☐

Choose price, indicator, or drawing as the condition.

08

☐

Write a message with the symbol and alert reason.

04

☐

Select Crossing Up, Crossing Down, or another precise trigger.

09

☐

Test the alert and confirm that it is active.

05

☐

Confirm frequency: once, per bar, or per bar close.

10

☐

Decide what you will verify when the alert fires.

WHEN THE ALERT FIRES

1. Recheck price and volume. 2. Confirm the wider market context. 3. Follow your plan - do not act automatically.

An alert is a monitoring tool. It is not proof of a valid entry and it is not a trading recommendation.
